

## ENR 6.3.1 DESIGNATORI PER PUNTI VFR VFR NAME-CODE DESIGNATORS

### 1 Generalità

Le indicazioni **TO** esprimono la rotta magnetica da seguire per arrivare al punto di riporto successivo della rotta VFR, qualora istituita.

Le indicazioni **FROM** sono espresse in gradi sia che riguardino L, NDB o VOR ed esprimono la radiale o il QDR della stazione trasmittente, ciò anche in considerazione che molte emittenti VOR si trovano in prossimità di una emittente L oppure NDB, in modo tale da potere usare il valore espresso in gradi FROM, con sufficiente approssimazione, da parte degli aeromobili sprovvisti di apparato VOR.

I valori di rilevamento e di distanza sono stati approssimati all'unità più vicina, per difetto o per eccesso e sono riferiti alla variazione magnetica esistente nel 2005 (2005.0).

### 1 General

Indication **TO** means magnetic track to be followed to the next VFR reporting point of the VFR route, when present.

Indication **FROM** is given in degrees regardless of L, NDB or VOR radiofacility available, it means the radial or the QDR from transmitting station. It is considered that some VOR stations are very near located to the L or NDB station so that the indication FROM may be used also by aircraft not VOR equipped.

Bearing and distance values are rounded to be nearest unit downwards or upwards and are referred to MAG VAR effective in 2005 (2005.0).
